

PURVA RAJARAM JAGTAP

Charlotte, NC | (704) 248-1900 | pjagtap1@uncc.edu | linkedin.com/in/purva-jagtap | github.com/purva115

SUMMARY

Full stack software engineer with 3+ years shipping production backend services, distributed data pipelines, and LLM-powered applications end to end across Python, Java, React/TypeScript, PostgreSQL, and AWS/Azure. Cut deployment time 40% and mean incident resolution 60% across 12 engineering teams; delivered a GenAI platform used by 5,000+ engineers.

TECHNICAL SKILLS

Languages: Python, Java, TypeScript, JavaScript, SQL, Bash

Backend & Distributed Systems: FastAPI, Spring Boot, REST APIs, microservices, webhooks, Redis, idempotent processing, pytest

Frontend: React.js, TypeScript, Streamlit, Flask, HTML/CSS

Data & Cloud: PostgreSQL, MySQL, Apache Airflow, ETL, AWS (S3, RDS, SES), Azure, Docker, Kubernetes, CI/CD, Git

AI & ML: LLMs, RAG, agentic workflows, LangChain, PGVector, PyTorch, Hugging Face, LoRA fine-tuning, quantization

EXPERIENCE

Auditrol | Charlotte, NC

Feb 2026 – Sept 2026

Full Stack Engineer

- Shipped the AI Governance lineage graph across FastAPI and React, rendering the GenAI estate as an expandable use case, artifact, control, and finding graph so auditors trace any finding to the model and prompt that produced it.
- Built GenAI Usage & Cost and NIST control-coverage backends joining live AWS Cost Explorer spend with per-model and per-use-case telemetry, covered by hermetic CI tests that stub the billing API.
- Fixed contradictory control statuses across two product screens by sourcing verdicts from the ml-service system of record over server-to-server HTTP rather than cross-database credentials, replacing a nullable-string join that silently matched nothing.
- Cut peak memory on risk exports from the full control taxonomy to one batch by streaming rows through an async generator with batched verdict lookups, moving row caps and concurrency into config so limits change without a deploy.
- Landed daily SAS Viya data quality snapshots from S3 into PostgreSQL via a four-stage Airflow pipeline, surfacing 453 breaches across 26 monitored attributes in four weeks with z-score and PSI drift detection over a rolling 30-day baseline.

UNC Charlotte | Charlotte, NC

Aug 2025 – May 2026

Graduate Teaching Assistant

- Automated peer-review assignment and grading workflows in Python against the Canvas API for Software Engineering (ITCS 3155) and Physics labs serving 30 students.

Amdocs Ltd | Pune, India

Jul 2022 – Dec 2024

Software Engineer

- Cut deployment time 40% (10 hrs to 6 hrs) and mean incident resolution 60% (45 min to 18 min) across 12 engineering teams by designing and shipping Java Spring Boot microservices and REST APIs.
- Delivered real-time deployment visibility to 5,000+ global users by building the GenAI Deployment Tracker in Python on Azure with REST webhooks; received the AT&T Radiant Recognition Award.
- Remediated 400+ security vulnerabilities in a production infrastructure microservice, improving reliability and compliance posture; supported on-call triage and production incident resolution.

PROJECTS

PharmaLLM Medicine Prescriber Chatbot

Python, PyTorch, LoRA, Flask, React

- Reached 92% F1 and 87% accuracy on held-out evaluation, reproducing published Springer research, by fine-tuning TinyLlama-1.1B with LoRA and 4-bit quantization on an 11,000-sample dataset.
- Built the multimodal stack: Whisper speech-to-text, gTTS synthesis, Flask inference API, and a React frontend.

CareLess: AI Patient Advocate

Gemini, ElevenLabs, Solana, Capital One API

- Won 3rd Place overall and Best Use of Solana at Pearl Hacks 2026 for an agentic AI assistant for healthcare cost transparency, combining voice, blockchain payments, and financial APIs in 24 hours.

Smart Attendance Monitoring System

Python, OpenCV, MySQL

- Shipped a computer vision attendance system with 90% face detection accuracy across 10+ institutes serving 100+ professors; 1st Prize, National Level Project Competition TECHCULT 2022.

EDUCATION

M.S. Computer Science, University of North Carolina at Charlotte | GPA 3.88 / 4.0

Expected Dec 2026

B.E. (Honors) Computer Engineering, Data Science, Savitribai Phule Pune University | GPA 8.74 / 10.0

Apr 2022
